

MSWAN

MAHARASHTRA STATE WIDE AREA NETWORK

The Maharashtra SWAN is envisaged as the backbone network for data, voice and video communications throughout the State and caters to the information communication requirements of the entire state government and its departments. The MSWAN consists of a 3 Tier structure. These tiers are:-

- State Head Quarter (SHQ)
- District Head Quarter (DHQ)
- Taluka Head Quarter (THQ)

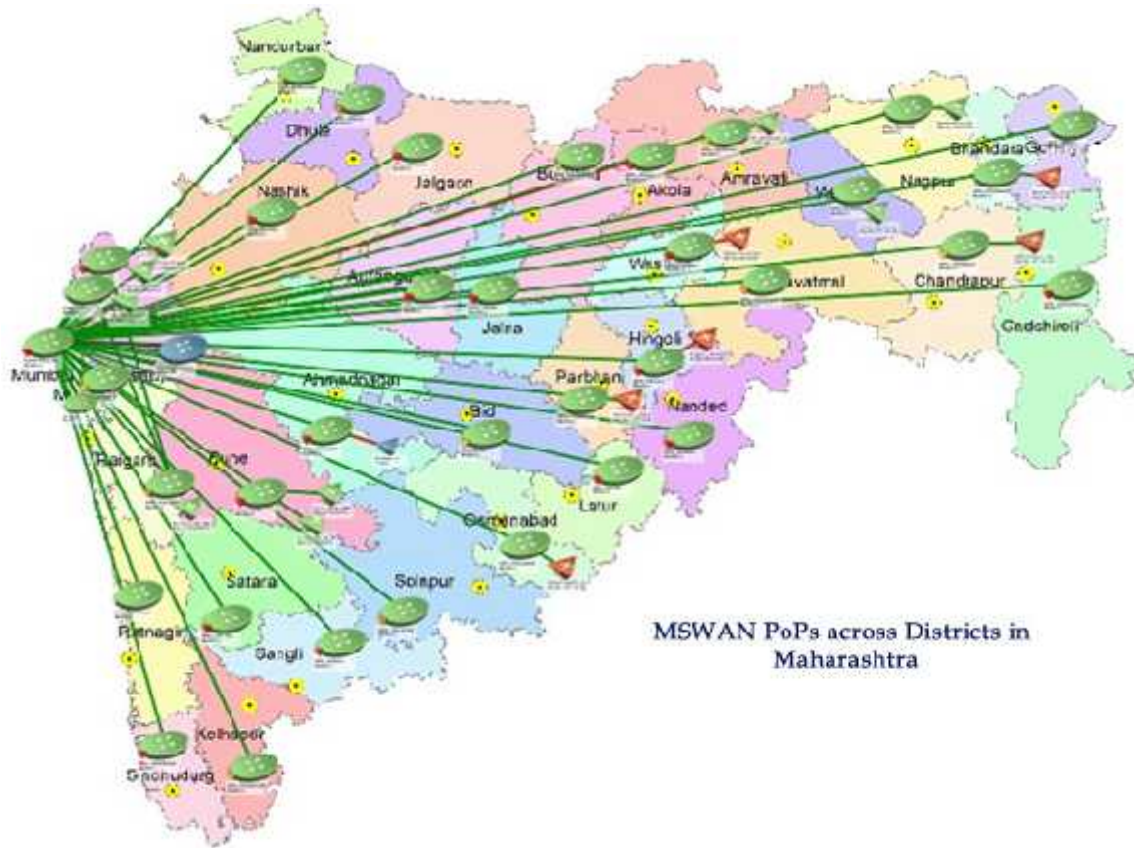

These tiers have Point of Presence and Point of Interconnectivity for various horizontal offices. MSWAN proposes to connect 35 District Head Quarters to the State head quarter, 358 Taluka Head Quarters and 6 Divisional Head Quarters to District Head Quarters. The following map shows the presence of MSWAN Pops across the state.

The estimated number of such departmental offices is said to be over 2,000. While the vertical connectivity facilitates seamless integration of the government machinery in the state from the state to the taluka level, horizontal connectivity knits together departments such as the police, treasury, transport departments, food & civil supplies, employment offices and municipal corporations. The latter will result in improving the internal efficiencies of the concerned departments. The state also wanted the network (SWAN) to support voice, data and video-based media applications and unique departmental applications.

Services Available by SWAN Project:-

- 1) Data
- 2) Voice
- 3) Video
- 4) Messaging
- 5) Security
- 6) Horizontal Connectivity
- 7) VPN Connectivity

MAHARASHTRA STATE WIDE AREA NETWORK

Security Offered by MSWAN

The services of the MSWAN are being used for various applications including the following:-

- HD video conference at State HQ, Mantralay, Divisional HQ and all District HQ and SD video conference at all Taluka HQ

- The implementation of horizontal connectivity for the following offices (800 offices) would also soon commence: Courts, Sales Tax Offices, Transport Offices, Maritime Board Offices, Urban Local Bodies
